Are You Making Money Out of Your Farm Properties?

1500
of this

ONE of our clients, a Kay County landowner, received \$182.17 rent on his 216 acre farm in 1932; the next year under our management 5 acres of waste were reclaimed, \$65 of back rent incurred prior to our management was collected by us, the soil vastly enriched by proper crop selection and supervision, and the rent increased from \$182.17 to \$241.50, a gain of 32% in a single year. The lowest gain for any farm under our management was 23.6% the highest, 18,804%.

If you would like to make more money out of your farm property plus increasing its sales value without additional cost to you, write, wire or phone for details, giving size and location of your properties.
